Subject: mussels from Big Creek

Glen-

Here are the mussels we found in Big Creek yesterday:

Yellow sandshell- *Lampsilis teres*  
White heelsplitter- *Lasmigona complanata*  
Rock pocketbook- *Arcidens confragosus*  
Giant floater- *Pyganodon grandis*  
Fragile papershell- *Leptodea fragilis*  
Bleufer- *Potamilus purpuratus*  
Washboard- *Megaloniaias nervosa*  
Flat floater- *Anodonta suborbiculata*

The only live individuals found were flat floater and white heelsplitter (one of each). No endangered species were found.

It was good to meet you. Talk to you soon (and happy holidays!)-

Susan
